

EL.CO miCRO Lift Controller

The Ultimate Product !

EL.CO Micro makes the difference!

The EL.CO Micro lift control system is an intelligent, flexible and cost effective controller. Thanks to it's modular design it can be configured according to your requirements and permits you to have a fast and error free installation.

Top performance for your Lifts!

The EL.CO MICRO main board is based on the powerful 32bit ARM microcontroller from ST Micro-electronics that is designed to operate in industrial environments under the harshest conditions. It is equipped with electronic protection against short circuit on all the inputs and outputs and the power supply, features that make EL.CO MICRO a robust and reliable choice for operation in every lift installation.
